

Florence School District Two is using the latest technology in identification system to protect your son or daughter from identity fraud. This new form of identification uses the finger and its characteristics to uniquely identify each person. The system measures many aspects of the finger to do this. The system **DOES NOT CREATE NOR DOES IT STORE ANY FINGERPRINTS**. This form of identification is called Biometrics, which translated, means measurements of human characteristics. ***THIS IS NOT FINGERPRINTING.***

The system is one directional. The finger is initially scanned and our system takes a variable amount of measurements based on the style of the finger and places these in storage by creating a numeric value that represents these measurements. Again, **NO FINGERPRINT IS STORED** for any of the students. There is no way to reverse the process and use the numeric values stored to create a fingerprint. Without the finger being placed on the reader, there is no knowledge of how many measurements went into the matching process to create this unique numeric. These measurements are random and unique to each Biometric reading.

Once this system is implemented your son or daughter is in complete control of their own identity. They only can be identified by placing their finger on the reader. This dramatically protects them from losing an id number or sharing that number with other students
